

SOCIAL MOTIVE

Reaching the Marginals

OrganiKo - Beautifying Life, with its original ambition to work for the rural communities, decided to reach and to emancipate the lives of marginalised sections of Indian Society.

Making the Donkey Owners Self-Reliant

Earlier the owners who were employed on seasonal basis according to the bricks carrying capacity of the Donkeys among others are hopeful to find the employment opportunities for the whole year.

Increasing the need to protect Donkeys

Due to lack of sufficient income of Donkey Owners, Donkeys were least taken care of and suffered from diseases due to exploitative 'loading' works. The initiative of OrganiKo-Beautifying Life is proving fruitful for the well-being of the animal. With our indulgence, they are now given access to care, shelter, food and health for increasing status of the milk. The beast of burden are now respected.
